DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: pages 1-2 of the specification lack of serial numbers for co-pending applications.

Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-36 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-40 of copending Application No. 10/022,611. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-36 of instance application is similar in scope to claims 1-40 of Application No. 10/022,611 with obvious wording variations. For example:

Regarding claims 1-36, Application No. 10/022,611 claimed for a method and system for billing for telephone usage, said method comprising: tracking usage of a telephony device by an *identifiable individual*, wherein said *identifiable individual is distinct from an owner* of said

Art Unit: 2643

telephony device; and *transferring a tariff for said tracked usage* of said telephony device to a billing plan for said identifiable individual, such that said owner of said telephony device is electronically compensated for said usage of said telephony device by said identifiable individual. Thus, in order for the identifiable individual, some source of authentication process must be perform to identify the individual using the telephone device that is not belongs to the individual. Therefore, the method and system claimed for transferring the tariff the billing plan of the individual is similar to instance application the method and system, claimed replacing the line subscriber (owner) billing plan with the caller (individual) billing plan.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
